KBON 101.1 Radio Station Eunice, LA

HISTORY

This location has some history but none very solid enough to confirm. Stories have been told that it was at one point in time a furniture store and a jewelry shop. But that is just hear say. This place is just too amazing to not speak about. It is a local Louisiana radio station. They play the best of Cajun, Zydeco, Swamp Pop and feature local musicians. The Dj's that we were privileged to meet were some pretty cool people. Mr. Paul Marx is in the process of writing a book about Louisiana ghost. We are very grateful for his openness to let us in to investigate.

Investigation

I wish we had more to report on evidence but we didn't really receive anything solid. The feeling in the back of this building was too eerie to pass up. One room we will call the "Indian room" is where people reported seeing a Native American man in full native attire. Following past this room you enter a small dark hallway where the stories are that a beautiful little girl is to walk past and wave to you. Unfortunately unable to report any evps or video evidence but can personally say that this place is creepy. We have no doubt that it may be haunted but will revisit to try and get proof.
