

INVESTIGATION SUMMARY REPORT

**PRIVATE RESIDENCE
SHREVEPORT, LA.**

**JOHN COMBS
CASE MANAGER
LOUISIANA SPIRITS
NORTH TEAM**

NOTE: THE CLIENTS IN THIS INVESTIGATION HAVE ALLOWED OPEN AND REASONABLE DISCLOSURE OF DATA GATHERED BY LA. SPIRITS ON THE INVESTIGATION IN THEIR HOME. SOME DATA MAY HAVE BEEN OBSCURED IF DEEMED A POTENTIAL INVASION OF REASONABLE PRIVACY. THIS IN NO WAY ACCEFFECTS THE DATA PRESENTED, OR THE CONCLUSIONS HEREIN.

HISTORY

This home is wood construction, on pier and beam. It is believed to be about 50 to 60 years of age. In the last few years, it has undergone major renovation and updating. The prior owners have contacted the current owners, asking if any strange events have happened since the house has been purchased.

EXPERIENCES

The current owners have two children, who in the recent months have exhibited some awareness on the strange things that seem to happen. A small boy in a vintage-style sailor suit has been seen. Shadow forms are seen in the entry hallway, in front of a bedroom doorway, and also in the hallway containing a freezer and the air conditioning intake. This intake system changes pitch when someone walks down this hallway, and this change is readily heard. These changes are often heard with no one to walk down the hallway. Footsteps and running feet are heard in this hallway, with no one in the area. The smell of blueberries has been not in the home.

Voices are heard both audibly throughout the home, no one in the area the sound comes from. Voices and music are heard on the baby monitor, with no one in the room where the unit is located. Objects are moved on a regular basis, often in an obvious manner, and are often “displayed”. A small bottle is emptied, and discarded into the trash can. An hour later, the bottle is found to have been removed and placed on the kitchen counter top, upside down.

INVESTIGATION

DATE OF INVESTIGATION: September 1st, 2012

PARTICIPANTS: BESS MAXWELL, KEITH MYERS, TRACI MYERS, JOHN COMBS, CONNIE WILLIAMSON, KIRK CORMIER

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, Various EMF meters including Tri-Fields, Motion detectors including geophone and laser grid systems, Ovilus interactive voice communications device, and PEAR REG-1 units for the detection of anomalous human consciousness with software on Hewlett-Packard computers.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. One standard EVP voice was recorded, and three EVP words formed by the P-SB7 were obtained.

A limited amount of data was recorded from the Ovilus device. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. No inordinate positive ion counts were noted.

PERSONAL EXPERIENCES

I, John Combs, was in the bathroom adjacent to bedroom number two, off the entry hallway, at about 10:45 PM. As I walked into the bathroom to check on a computer test, the flashlight I was carrying and the computer on the bathroom counter top were suddenly and completely drained of all battery power. The flashlight had new batteries installed earlier in the evening, and these generally last all evening with no failure problems. The computer normally will last until about 2:00 AM, approximately, under similar operating conditions. On the evening in question here, the computer only had performed only than 5 tests, and failed on the 6th test. This was extremely light usage. Subsequent testing of this computer and its batteries has shown the batteries to be holding charge through at least 5 to 6 hours on normal usage. The dual and instant drain of both sets of batteries remains without adequate and natural explanation.

PART TWO

Consciousness Detection

This type of testing is passive in nature and designed to detect, through the quantum tunneling method, the probability that a human type consciousness may be present affecting the REG-1 units, when all incarnate consciousness has been removed from the areas of testing.. The minimum reporting standard for this type testing is $p < .05$, with p (probability) representing the chance that the event could be the result of chance alone in the probability distribution. Thus, the probability of an anomaly is 95% per test, or greater, to be considered statistically significant. We then compute the probability that all tests are false, that is, that none of the tests indicate an anomaly.

A total of 36 tests were run in all areas. At the minimum reporting standard of .05, we would expect to receive a total of 1.8 tests (rounded up to 2.0) due to chance alone affecting the probability distribution, resulting in 1.8 (2.0) false positives for the human consciousness being the cause. ($36 \times .05 = 1.8$) The actual mean score for the 20 positive tests was $p < .019206$. The correction for the number of expected false positives would be $36 \times .024225 = .69$ false positives, which we would round up to 1. As noted, we received 20 positives, much greater then the mathematically expected 1 if only chance were involved.

After the room designation, the number or alpha character designates the test number or sequence in that room, on that particular testing computer.

EXAMPLE: BRThree1 Bedroom number three, test number one.

The test scores are as follows:

COMPUTER 1

Master Bedroom 1	$z = 2.266$	$p < .011725$
Master Bedroom 3	$z = 2.013$	$p < .022057$
Master Bedroom 4	$z = 2.034$	$p < .020976$
Kitchen 3	$z = 1.831$	$p < .033550$

COMPUTER 2

Bedroom Two 3	$z = 2.260$	$p < .011911$
Bedroom Two 4	$z = 2.509$	$p < .006054$
Bedroom Two 5	$z = 4.071$	$p < .000023$

COMPUTER 4

Entry Hall 2	$z = 2.327$	$p < .009982$
Bathroom Two 1	$z = 2.817$	$p < .002484$

COMPUTER 5

Bedroom One 2	$z = 1.760$	$p < .039204$
Bedroom One 3	$z = 2.136$	$p < .016340$
Bedroom One 4	$z = 1.750$	$p < .040059$
Main Bath 1	$z = 1.918$	$p < .027556$

PART THREE

The Ovilus

Carl Jung, Swiss psychiatrist and the father of analytical psychiatry, coined the word "synchronicity". Synchronicity - The experience of two or more events, that are apparently causally unrelated or unlikely to occur together by chance, that are observed to occur together in a meaningful manner.

This concept does not question or compete with the notion of causality. Instead, it maintains that just as events may be grouped by cause, they may also be grouped together by meaning. Since meaning is a complex mental construction, subject to both conscious and unconscious influence, not every correlation in the grouping of events by meaning needs to have an explanation of cause and effect.

NOTE: In the paranormal, there are many experiences which are noted and observed for which the laws of science, as we know and understand them at this time, cannot explain. In EVP studies, blank and sealed cassette tapes have been found to have EVP voices on them, without having been previously inserted into a recorder. The actual method of the sending of EVP voices remains unknown. Television sets, while turned off, have had faces of the deceased plainly visible, as if the set were on. Telephone calls with the caller having the voice and knowledge of a deceased individual have been heavily documented. Phone calls and text messages have been sent to cell phones which have no SIM card to properly receive calls, but do receive the anomalous calls. We simply do not know, at this time, exactly how these events occur or are possible.

In paranormal research, it is the reporting of these cases that is important. These and similar phenomena are reported by individuals who have never met or known each other, and live thousands of miles apart, and often hundreds of years. Yet the reports remain consistent. Case studies, in volume and over time, allow for hypotheses and theories. It is in this simple interests of reporting that this section is included.

The Ovilus is a device that intercepts EMF signals, and converts them to audio, from an internal dictionary of over 2,000 words. It is theorized that discarnate entities may be able to INFLUENCE, under some circumstances, this word selection process. It is not thought, in the majority, that these entities may exert 100% CONTROL over the word selection, and simple research and listening to the output of the device verifies this, to the normal and reasonable individual. It is also noted that coincidence may play a part in the process, with the probability of about 1 in 2,047, in getting a correct response to a direct question. It is only in the long term studies, with consistent reporting, that more exacting theories regarding coincidence versus influence may be formulated. Probability, from a math standpoint, rises sharply as valid answers are observed in larger quantity, over a brief period of time and small number of total responses. For example, the probability of getting two correct responses in a row is 1 in 4,190,209. (1/2047 x 1/2047) This assumes there is only one correct response per each individual question.

The manufacturer of the Ovilus device indicates at the present time, there is insufficient data, science, and case study to indicate the Ovilus data should be evidential. This author agrees. This case study is not presented as hard evidence. It is presented so that others may have and consider its merits, or lack thereof. If no reporting is made, no theories may be formulated, or comparisons made with other reports to study correlations, if any. Each person who reads Part

Three must consider this data in light of his own beliefs, or knowledge of events that are known to have occurred to them personally. Beauty here is truly in the eye of the beholder, or its lack thereof.

SUMMARY OF INTRODUCTION - PART THREE - The data presented here on Part Three IS NOT CONSIDERED EVIDENTIAL by the manufacturer of the Ovilus device or the La. Spirits North Team. It is simply included in the interests of completeness of events, and for study/research purposes only.

PART FOUR

THE MODEL P-SB7 SPIRIT BOX

This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.

CLIP ONE: BESS MAXWELL, in the daughter's bedroom.
Bess requests, “Tell us your name”.
Anomalous reply: “Matthew”.

CLIP TWO: BESS MAXWELL, in the baby's room.
Investigators had been requesting names of those present.
Anomalous female voice: “Martin, speak”.
Voice two: “Watson”.
Voice three: “Walter”.

CLIP THREE: BESS MAXWELL, KEITH MYERS, TRACI MYERS, in the baby's room.
Conversation regarding the number of anomalous individuals present.
Keith Myers asks, “Give us a number”.
Voice one: “Two, simple”.
Voice 2: “Three”.
Voice 3: “Three”.

STANDARD EVP

No intentional energy added

All subsequent clips recorded by Connie Williamson.

CLIP ONE: Daughter's Bedroom – Connie Williamson, Bess Maxwell, Keith Myers.
Connie Williamson is asking questions about blueberries, and an anomalous voice responds to this by asking, “Help me move out”.

PART FIVE

McDANIEL REPORT

THEORETICAL EFFECTS OF ENVIRONMENTAL ENERGY ON PARANORMAL PHENOMENA

Over many years, there seem to be consistent reports from individuals who live many miles, and often, many years apart concerning a correlation between extra energy in the environment and a perceived increase in paranormal activity. It is readily acknowledged that the sun is the greatest source of energy in our solar system, and this energy is in a constant state of flux. When solar energy is increased through solar flares, and other types of solar activity, the number of reports of paranormal activity increases. These flares and eruptions cause x-ray events, radio events, proton flux, electron flux, and geomagnetic impulses. It is readily acknowledged that these effect everything on our planet from weather, to satellite communications, disruptions in electrical grids, and even the flow in pipelines. These events also result in what is known as geomagnetic induced currents (gic) or telluric currents in the earth's crust, and waterways. These electrical flows tend to go toward the sun in general, as well as toward the equator in the daytime, and the poles at night.

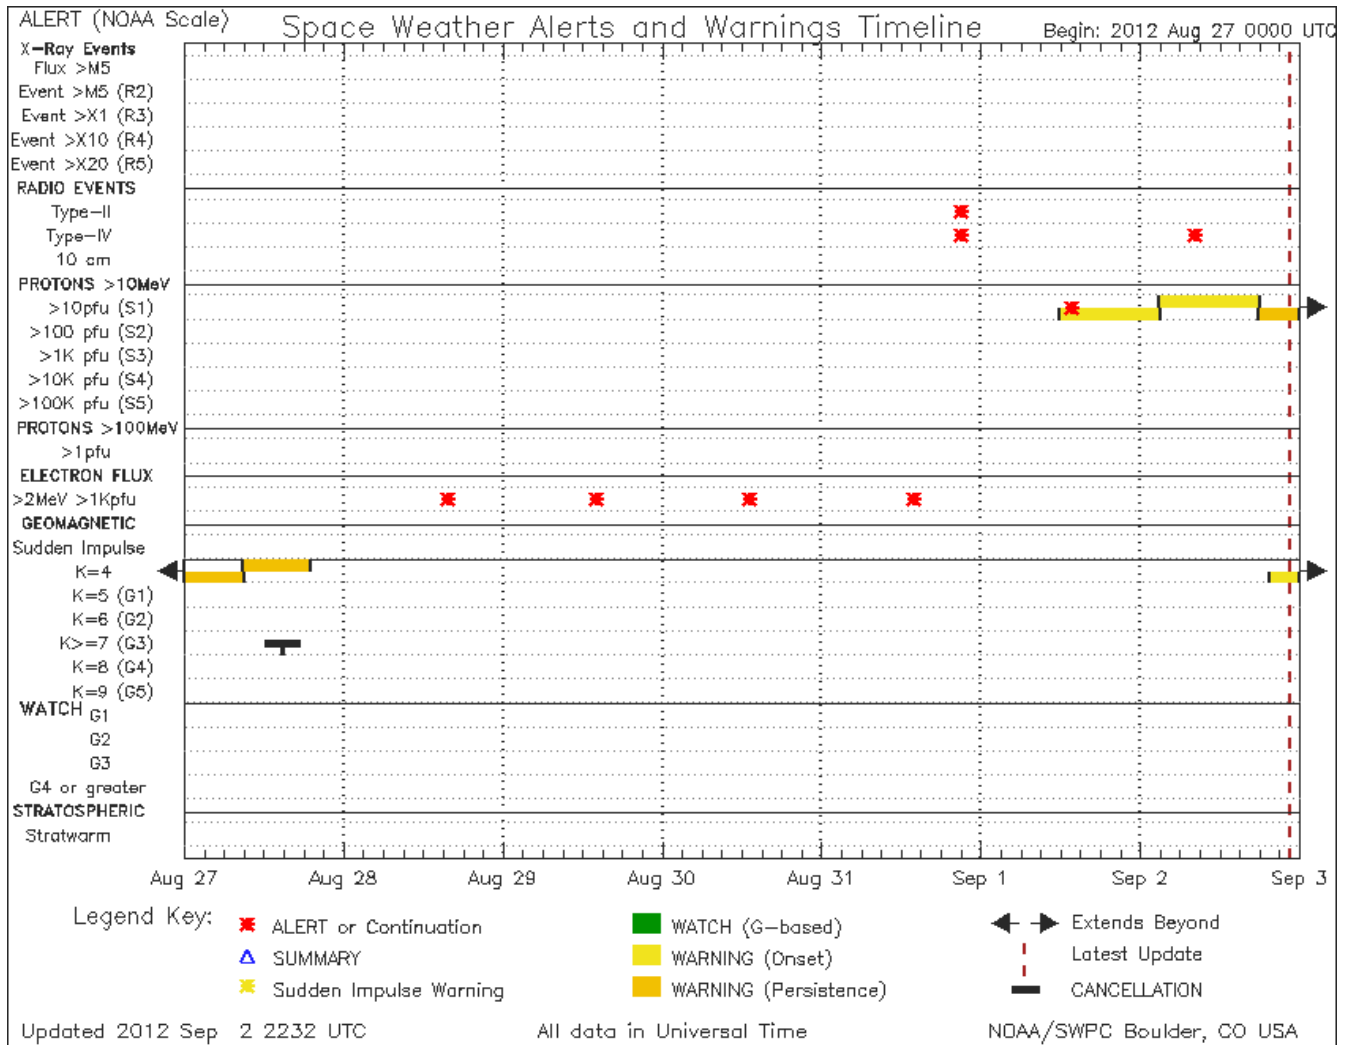

We do not, at this time, totally understand how environmental energy sources can effect paranormal phenomena in a direct manner, or even if they do. Also, this author readily concedes that if paranormal activity is increased by local energy, that solar energy is not the only available source of local energy; it is just the most prevalent. If this relationship does exist, it would support the general observations of myself and others of a propensity of paranormal activity to be detectable in areas where water and large quartz deposits are found, as these would be conductors for the telluric currents, thus making energy readily available.

This author feels that in order to perform research on the correlations of solar weather and paranormal activity, long term case studies offer the best method, as of this time, to find support, or to deny, this hypothesis. Therefor, data concerning solar weather for the date of our paranormal investigations will be supplied, with no efforts made to draw conclusions thereof, either positive or negative. This data is provided by the National Oceanic and Atmospheric Administration. The NOAA also readily states that the total effects of space weather on live biological entities on planet earth is not known or understood at this time, either.

If an attached graph does not show activity on the date and/or time of our investigation, it does not mean that there was no solar activity, but the the solar activity at this time was considered normal.

CONCLUSION: This data is not meant to conclusively show that any paranormal activity, or lack thereof, found on our investigation was caused by the solar activity at that time, but that there could possibly have been an influence by the solar weather at this time, positively or negatively correlated to the strength of such solar weather. Other such energy systems as lunar cycles, thunderstorms, and utility networks may provide an alternative energy supply for paranormal phenomena.

Space Weather Alerts and Warnings Timeline

NOTE: DATE OF INVESTIGATION 09/01/2012

SPACE WEATHER CONDITIONS WERE ABOVE NORMAL AT THE TIME OF RESEARCH.

END OF PART FIVE

CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Three EVP recordings were made of words formed by the P-SB7, and one EVP voice was obtained by standard digital recording. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. The consciousness testing was strong, and consistent in many areas. We feel that the personal experiences, the extensive audio noted, and the positive tests received in the PEAR testing are probably indicative of an anomalous presence or presences

We would like to thank the clients for inviting us into their home, and for the opportunity to study the phenomena there. We would also like to thank them for their most gracious hospitality, and hope that me may be able to return there again soon.
