

INVESTIGATION SUMMARY REPORT

**PRIVATE RESIDENCE
DOYLINE, LA.**

**BESS MAXWELL
CASE MANAGER
LOUISIANA SPIRITS
NORTH TEAM**

**NOTE: THE CLIENTS IN THIS INVESTIGATION HAVE REQUESTED
CONFIDENTIALITY. SOME OF THE DATA IN THIS REPORT MAY HAVE BEEN
OBSCURED TO HONOR THEIR REQUEST. THIS IN NO WAY AFFECTS THE DATA
PRESENTED, OR ANY CONCLUSIONS HEREIN. NO PHOTOS OF THE INTERIOR OR
THE EXTERIOR OF THE RESIDENCE HAVE BEEN INCLUDED.**

HISTORY

This residence is a wood frame home which has been in the client's family four about four generations. In this time period, some remodeling and updating has taken place.

EXPERIENCES

There are a reports of a possible male spirit presence, including visual and vocal. The figure is an older male, with a white shirt. He has been seen not only in the hallway, but in other areas of the home as well. There are also reports he has been seen outside, including on the front porch. The clients have heard distinct footsteps in the hallway, with no one in the area to have made the sounds. Individuals have felt unseen hands touching them in bed, primarily in the throat area. Objects have been moved by unseen hands, no one on the area to have moved these objects.

INVESTIGATION

DATE OF INVESTIGATION: June 4th, 2016

PARTICIPANTS: BESS MAXWELL, KEITH MYERS, KIRK CORMIER, CONNIE WILLIAMSON, TRACI MYERS, JOHN COMBS, AND SUSAN COLEMAN

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, Various EMF meters including Tri-Fields and Rempod, Motion detectors including geophone and laser grid systems, Ovilus interactive voice communications device, and PEAR REG-1 units for the detection of anomalous human consciousness with software on Hewlett-Packard computers.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. One EVP clip was recorded. Two EVP clips formed by the P-SB7 were noted.

PERSONAL EXPERIENCES

NONE NOTED.

PART ONE - AUDIO

THE MODEL P-SB7 SPIRIT BOX

This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.

TWO AUDIO CLIPS WERE OBTAINED ON THE P-SB7.

CLIP ONE: BESS MAXWELL HAD ASKED FOR A NEMAE FOR ANY SPIRIT PRESENCES.

MALE VOICE: “RICKY”.

CLIP TWO: BESS MAXWELL ASKED, “HOW MANY SPIRITS ARE HERE IN THIS HOUSE?”

HIGH PITCHED VOICE: “TW0”.

STANDARD EVP AUDIO, WITH NO INTENTIONALLY ADDED ENERGY SOURCE

BESS MAXWELL, WITH TEAM MEMBERS AND IN THE TWO BACK BEDROOMS.

CLIP ONE: CONNIE WILLIAMSON ASKED, “CAN YOU MAKE ANY NOISE, JUST SO WE WILL KNOW YOU ARE HERE? JUST A KNOCK? (CONNIE MAKES A KNOCKING NOISE.) JUST LIKE THAT. ANYTHING AT ALL.”

THERE IS THEN A SOUND, AS IF SOMEONE WERE WALKING ON THE WOODEN FLOOR, AS HAD BEEN REPORTED. NO ONE WAS IN THE AREA OF THE SOUND.

CONNIE WILLAIMSON ASKS, “WHAT WAS THAT?”

KIRK CORMIER SAYS, “YOUR LIGHT JUST CAME ON.”

PART TWO

Consciousness Detection

This type of testing is passive in nature and designed to detect, through the quantum tunneling method, the probability that a human type consciousness may be present affecting the REG-1 units, when all incarnate consciousness has been removed from the areas of testing.. The minimum reporting standard for this type testing is $p < .05$, with p (probability) representing the chance that the event could be the result of chance alone in the probability distribution. Thus, the probability of an anomaly is 95% per test, or greater, to be considered statistically significant. We then compute the probability that all tests are false, that is, that none of the tests indicate an anomaly.

A total of 29 tests were run in all areas, except for the living room and kitchen areas. None were run in these areas. At the minimum reporting standard of .05, we would expect to receive a total of 1.45 positives due to chance alone affecting the probability distribution, resulting in 1.45 false positives for the human consciousness being the cause. ($29 \times .05 = 1.45$) The actual mean score for the 20 positive tests was $p < .018690$. The correction for the number of expected false positives would be $29 \times .018690 = .54$ false positives, as 1.0 As noted, we received 20 positives, much greater then the mathematically expected 1 if only chance were involved.

After the room designation, the number or alpha character designates the test number or sequence in that room, on that particular testing computer.

EXAMPLE: BRThree1 Bedroom number three, test number one.

The test scores are as follows:

COMPUTER 1

Living Room 1	$z = 2.517$	$p < .005918$
Living Room 2	$z = 2.482$	$p < .006532$
Living Room 3	$z = 1.695$	$p < .045038$
Bedroom Two 3	$z = 2.187$	$p < .014371$
Bedroom Two 4	$z = 1.777$	$p < .037784$

COMPUTER 4

Kitchen 2	$z = 2.188$	$p < .014334$
-----------	-------------	---------------

COMPUTER 7

Bedroom One 1	$z = 2.000$	$p < .022750$
Bedroom One 2	$z = 2.213$	$p < .013449$
Bedroom Three 1	$z = 2.022$	$p < .021588$
Bedroom Three 2	$z = 2.161$	$p < .015347$

The probability that these 10 tests are all false positives, due to chance alone in the probability distributions, and not indicative of human consciousness interaction when none incarnate was present to do so, through quantum tunneling is:

PROBABILITY

.000000000000000000137

ANOTHER WAY OF EXPRESSING THIS NUMBER IS

1.37 X 10 TO THE MINUS 18th POWER

PART TWO**

PART THREE

The Ovilus

Carl Jung, Swiss psychiatrist and the father of analytical psychiatry, coined the word “synchronicity”. Synchronicity - The experience of two or more events, that are apparently causally unrelated or unlikely to occur together by chance, that are observed to occur together in a meaningful manner.

This concept does not question or compete with the notion of causality. Instead, it maintains that just as events may be grouped by cause, they may also be grouped together by meaning. Since meaning is a complex mental construction, subject to both conscious and unconscious influence, not every correlation in the grouping of events by meaning needs to have an explanation of cause and effect.

NOTE: In the paranormal, there are many experiences which are noted and observed for which the laws of science, as we know and understand them at this time, cannot explain. In EVP studies, blank and sealed cassette tapes have been found to have EVP voices on them, without having been previously inserted into a recorder. The actual method of the sending of EVP voices remains unknown. Television sets, while turned off, have had faces of the deceased plainly visible, as if the set were on. Telephone calls with the caller having the voice and knowledge of a deceased individual have been heavily documented. Phone calls and text messages have been sent to cell phones which have no SIM card to properly receive calls, but do receive the anomalous calls. We simply do not know, at this time, exactly how these events occur or are possible.

In paranormal research, it is the reporting of these cases that is important. These and similar phenomena are reported by individuals who have never met or known each other, and live thousands of miles apart, and often hundreds of years. Yet the reports remain consistent. Case studies, in volume and over time, allow for hypotheses and theories. It is in this simple interests of reporting that this section is included.

The Ovilus is a device that intercepts EMF signals, and converts them to audio, from an internal dictionary of over 2,000 words. It is theorized that discarnate entities may be able to INFLUENCE, under some circumstances, this word selection process. It is not thought, in the majority, that these entities may exert 100% CONTROL over the word selection, and simple research and listening to the output of the device verifies this, to the normal and reasonable individual. It is also noted that coincidence may play a part in the process, with the probability of about 1 in 2,047, in getting a correct response to a direct question. It is only in the long term studies, with consistent reporting, that more exacting theories regarding coincidence versus influence may be formulated. Probability, from a math standpoint, rises sharply as valid answers are observed in larger quantity, over a brief period of time and small number of total responses. For example, the probability of getting two correct responses in a row is 1 in 4,190,209. (1/2047 x 1/2047) This assumes there is only one correct response per each individual question.

The manufacturer of the Ovilus device indicates at the present time, there is insufficient data, science, and case study to indicate the Ovilus data should be evidential. This author agrees. This case study is not presented as hard evidence. It is presented so that others may have and consider its merits, or lack thereof. If no reporting is made, no theories may be formulated, or comparisons made with other reports to study correlations, if any. Each person who reads Part Three must consider this data in light of his own beliefs, or knowledge of events that are known

to have occurred to them personally. Beauty here is truly in the eye of the beholder, or its lack thereof.

SUMMARY OF INTRODUCTION - PART THREE - The data presented here on Part Three IS NOT CONSIDERED EVIDENTIAL by the manufacturer of the Ovilus device or the La. Spirits North Team. It is simply included in the interests of completeness of events, and for study/research purposes only.

CLOSING NOTES – PART THREE

There may have been additional incidents, or not. We have presented these incidents in Part Three in the interests of research and completeness of studies performed. It is acknowledged that answers may, in many cases, rely on judgment as to the accuracy of the answer. If the question, “Is the car red?” is posed, assuming the car’s color is not a transition color, the answer of either “yes” or “no” may be easily evaluated. Or, assuming no transition color, the answer to “What color is the car?”, the answer “red” may be easily evaluated. Others are not so simple, “Happy”, for example. And it is readily acknowledged that those hearing a response from an Ovilus device may NOT have sufficient knowledge to correlate a given answer as relevant or “correct”. The volume of comments received from the Ovilus device was very large, and there may be meanings that those of us not experiencing daily life at this home, or intimately familiar with its history, do not have a connotation for. The list is presented as received, in proper order, in the interest of completeness of research conducted. It is also noted that, although the words are spoken individually, there may be meanings or connotations in word groupings within word lists. These meanings or connotations may only be meaningful to certain individuals with the experiences to which these word phrases pertain, and not to all individuals. Words within the list that have an inordinate statistical frequency of appearance may also fall within the meaningful category, and need to be analyzed by those with a more intimate knowledge of the history of the location.

**END
PART THREE**

CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring and electrical devices. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Two EVP clips were made of words formed by the P-SB7. One EVP clip was recorded by standard digital recording. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. The consciousness testing was strong, and consistent in many areas. We feel that these experiences, and the positive tests received are probably indicative of an anomalous presence or presences, and that these do not seem malicious or harmful in any way.

We would like to thank the clients for inviting us into their home, and for the opportunity to study the phenomena there. We would also like to thank them for their most gracious hospitality, and hope that me may be able to return there again soon.
