

# INVESTIGATION SUMMARY REPORT

PRIVATE RESIDENCE  
HAUGHTON, LA.

BESS MAXWELL  
CASE MANAGER  
LOUISIANA SPIRITS  
NORTH TEAM

**NOTE: THE CLIENTS IN THIS INVESTIGATION HAVE REQUESTED CONFIDENTIALITY. SOME OF THE DATA IN THIS REPORT MAY HAVE BEEN OBSCURED TO HONOR THEIR REQUEST. THIS IN NO WAY AFFECTS THE DATA PRESENTED, OR ANY CONCLUSIONS HEREIN. NO PHOTOS OF THE INTERIOR OR THE EXTERIOR OF THE RESIDENCE HAVE BEEN INCLUDED.**

# HISTORY

The clients are the second family to own the residence, which is of recent vintage.

## EXPERIENCES

The clients have had experiences since moving in. These seem to center around noises with no one in the area where the noises seem to come from. Some objects have been moved when no one in the family recalls moving them.

## INVESTIGATION

DATE OF INVESTIGATION: September 17<sup>th</sup>, 2016

PARTICIPANTS: BESS MAXWELL, CONNIE WILLIAMSON, KIRK CORMIER, JOHN COMBS, AND SUSAN COLEMAN

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, Various EMF meters including Tri-Fields and Rempod, Motion detectors including geophone and laser grid systems, Ovilus interactive voice communications device, and PEAR REG-1 units for the detection of anomalous human consciousness with software on Hewlett-Packard computers.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. Two anomalous clips of light were noted on video that were not readily explainable to those there at time of recording. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. One shadow figure was noted in thr hallway. Three standard EVP clips were recorded. No EVP clips formed by the P-SB7 were noted. The consciousness testing was strong, and consistent in many areas.

### PERSONAL EXPERIENCES

SUSAN COLEMAN noted a shadow figure cross the hallway. No one was in that area at that time.

# **PART ONE - AUDIO**

## **THE MODEL P-SB7 SPIRIT BOX**

**This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.**

**NO AUDIO CLIPS WERE OBTAINED ON THE P-SB7.**

**STANDARD EVP AUDIO, WITH NO INTENTIONALLY ADDED ENERGY SOURCE**

**CLIP ONE: Kirk Cormier and Bess Maxwell were in the master bedroom, and recorded a clip of animal-like sound, specifically the sound of a duck quacking in the room. The sound was not heard at time of recording.**

**CLIP TWO: Consistent with client claims, the distinct sound of a loud crack was recorded in the living room, empty at the time. No natural cause could be found.**

**CLIP THREE: At the time Susan Coleman saw the shadow in the hallway, a human voice, mumbled and unclear of meaning, was recorded. This voice was not heard at time of recording.**

# PART TWO

## Consciousness Detection

This type of testing is passive in nature and designed to detect, through the quantum tunneling method, the probability that a human type consciousness may be present affecting the REG-1 units, when all incarnate consciousness has been removed from the areas of testing.. The minimum reporting standard for this type testing is  $p < .05$ , with  $p$  (probability) representing the chance that the event could be the result of chance alone in the probability distribution. Thus, the probability of an anomaly is 95% per test, or greater, to be considered statistically significant. We then compute the probability that all tests are false, that is, that none of the tests indicate an anomaly.

A total of 20 tests were run in all areas. At the minimum reporting standard of .05, we would expect to receive a total of 1.0 positives due to chance alone affecting the probability distribution, resulting in 1.0 false positives for the human consciousness being the cause. ( $20 \times .05 = 1.0$ ) The actual mean score for the 20 positive tests was  $p < .026150$ . The correction for the number of expected false positives would be  $20 \times .026150 = .52$  false positives, less than 1. As noted, we received 10 positives, much greater than the mathematically expected 1 if only chance were involved, and at the minimum standard, and less than 1 at the reported average standard.

After the room designation, the number or alpha character designates the test number or sequence in that room, on that particular testing computer.

EXAMPLE: BRThree1 Bedroom number three, test number one.

The test scores are as follows:

### COMPUTER 1

Living Room 2	$z = 2.590$	$p < .004799$
Living Room 4	$z = 2.199$	$p < .013939$
Kitchen 3	$z = 2.287$	$p < .011097$

### COMPUTER 4

Bedroom One 1	$z = 1.887$	$p < .029580$
Bedroom One 3	$z = 1.995$	$p < .023021$
Bedroom Three 3	$z = 1.681$	$p < .046381$
Bedroom Three 4	$z = 2.075$	$p < .018993$

### COMPUTER 8

Bedroom Two 1	$z = 1.660$	$p < .048457$
Bedroom Two 2	$z = 1.682$	$p < .046284$
Bedroom Two 4	$z = 2.076$	$p < .018947$

The probability that these 10 tests are all false positives, due to chance alone in the probability distributions, and not indicative of human consciousness interaction when none incarnate was present to do so, through quantum tunneling is:

**PROBABILITY**

**.00000000000000000189**

**ANOTHER WAY OF EXPRESSING THIS NUMBER IS**

**1.89 X 10 TO THE MINUS 17<sup>th</sup> POWER**

**END  
PART TWO**

# CONCLUSION

At the time and places tested, no anomalous photos were taken. Two anomalous clips of light anomalies data were noted on video. Nothing unusual was detected by laser grid. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring and electrical devices. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. No EVP clips were made of words formed by the P-SB7. Two standard EVP clips were recorded by standard digital recording. One shadow figure was noted in the hallway. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. The consciousness testing was strong, and consistent in many areas. We feel that these experiences, and the positive tests received are probably indicative of an anomalous presence or presences, and that these do not seem malicious or harmful in any way.

**We would like to thank the clients for inviting us into their home, and for the opportunity to study the phenomena there. We would also like to thank them for their most gracious hospitality, and hope that me may be able to return there again soon.**
