

## Investigation Summary Report

### Private Residence

Iota, LA

### HISTORY

The home is a small two bedroom trailer home. There has only been one reported, natural death, know to happen inside the home. The claims reported to us by the current homeowners consisted of hearing footsteps, seeing shadows, and on one occasion, the husband being held down in bed while seeing a shadow figure in the corner of the room.

Matt and Charles arrived at the home at approximately 8:30pm . We conducted a small interview, set up two DVR cameras and went lights out at 9:30 . The night was relatively quiet. No shadows we seen at any point during the investigation. At one time in the night we heard unexplained foot steps. After review of the cameras it was determined that the cats were to blame. We conducted several EVP sessions with the home owners in attempt to gather different spirit reactions. After a very quite night and at partial request of the homeowners we ended the investigation a 1:30am .

After review of the DVR and audio, no significant evidence was found. We informed the homeowners of sleep paralysis, and encouraged them to research the condition in case the held down feeling happened to return. They were happy to know if any activity were to pick up or if they began to feel uneasy with anything happening in the home to call us and we would be there.
