

Investigation Summary Report

Private Residence

Jennings, LA

HISTORY

There is a home in Jennings La., which is being shared by more than just the owner and his family. The older children, who have since moved out, recall seeing and interacting with a young girl spirit since they were young children. To this day she is seen from time to time roaming through the home, and apparently still interacting with the grandchildren residing there now. Besides seeing the young girl, the owner claims they here voices from time to time. Shadows have been seen passing through the living room, as if to be heading to the recliners to sit. A woman was seen standing next to, and staring at the grandbaby lying in its crib sleeping. Owners expressed that in several of the rooms in the house, their pet dog reacts as though something is there, only to find the room is empty. Other than the little girl, the owners believe all the other activity they experience is merely family members who have passed, and have chosen to remain with them.

LaSpirits SW Chapter was called in to try and document some of the activity taking place. Present were Aaron, Danita, Connie, and David. Investigation commenced around 9 p.m. The night was quiet as far as activity, or personal experiences. We were unable to capture anything in pictures, or video, but we were able to capture a couple pieces of audio.
