

INVESTIGATION SUMMARY REPORT

**PRIVATE RESIDENCE
MINDEN, LA.**

**JOHN COMBS
CASE MANAGER
LOUISIANA SPIRITS
NORTH TEAM**

NOTE: THE CLIENT IN THIS INVESTIGATION HAS REQUESTED CONFIDENTIALITY. SOME OF THE DATA IN THIS REPORT MAY HAVE BEEN OBSCURED TO HONOR THEIR REQUEST. THIS IN NO WAY AFFECTS THE DATA PRESENTED, OR ANY CONCLUSIONS HEREIN. NO PHOTOS OF THE INTERIOR OR THE EXTERIOR OF THE RESIDENCE HAVE BEEN INCLUDED.

HISTORY

This home was built in the 1970, two-story brick construction. The current owner has owned the property for approximately four years. The home seems to have had a history of anomalous events since its inception. This home also seems to be in a constant state of remodeling, with many of the additions being such things as antique wood flooring and glass doors from well-known commercial locations, light fixtures from plantation homes in south Louisiana, as well as some light fixtures from London.

EXPERIENCES

Both the current owner as well as past owners report anomalous events. Shadow figures have been seen in the hall area near the bar, as well as seated in the living room. The exterior door in the den, even when locked, opens itself, and the handle has been observed turning as it has done so. In the den, a past owner built a fire in the fireplace and let it get out of control. Smoke covered the wooden sides and top above the opening, as well as the mantle. Once the fire was out, the owner and his son returned to clean the wood, only to find this area, once covered in both smoke and soot, to be 100% clean. A pipe burst upstairs into the master bath area, causing about 2 inches of water on the floor, all of which exited along the exterior wall, with almost none soaking into the den below. The only water going into the den area, fell into a flower pot, with no water in the den, other than that in the flower pot.

The current owner has felt presences in many areas of the home. In the master bedroom, the owner decided to take a nap, needing to arise in one hour prompt. The alarm was not set. The owner awoke with the feeling of a hand stroking her cheek, only to find she had slept exactly one hour.

Objects are moved around with regularity, and seldom found immediately. These are generally found days later in the same exact spot where they had disappeared. Electrical devices are turned off and on with regularity. Computers and cell phones work intermittently, with no discernible pattern, including those of guests.

The feelings of a presence are also noted in the bedroom of the apartment about the garage. Hand prints appear on the walls, and names are often found there also, with no one around to have placed them there. This area is separate entrance, guarded by a wrought iron, lockable gate.

INVESTIGATION

DATE OF INVESTIGATION: April 21st, 2012

PARTICIPANTS: JAMES PALMER, BESS MAXWELL, KEITH MYERS, TRACI MYERS, JOHN COMBS, CONNIE WILLIAMSON, KIRK CORMIER

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, Various EMF meters including Tri-Fields, Motion detectors including geophone and laser grid systems, Ovilus interactive voice communications device, and PEAR REG-1 units for the detection of anomalous human consciousness with software on Hewlett-Packard computers.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Eight EVP clips were formed by the P-SB7. A limited amount of data was recorded from the Ovilus device. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. No inordinate positive ion counts were noted. Data garnered from the REG-1 consciousness testing was very strong.

PART TWO

Consciousness Detection

This type of testing is passive in nature and designed to detect, through the quantum tunneling method, the probability that a human type consciousness may be present affecting the REG-1 units, when all incarnate consciousness has been removed from the areas of testing.. The minimum reporting standard for this type testing is $p < .05$, with p (probability) representing the chance that the event could be the result of chance alone in the probability distribution. Thus, the probability of an anomaly is 95% per test, or greater, to be considered statistically significant. We then compute the probability that all tests are false, that is, that none of the tests indicate an anomaly.

A total of 78 tests were run in all areas. At the minimum reporting standard of .05, we would expect to receive a total of 3.9 tests (4.0) due to chance alone affecting the probability distribution, resulting in 3.9 (4.0) false positives for the human consciousness being the cause. ($78 \times .05 = 3.9$) The actual mean score for the 41 positive tests was $p < .024225$. The correction for the number of expected false positives would be $78 \times .024225 = 1.89$ false positives, which we would round up to 2. As noted, we received 41 positives, much greater than the mathematically expected 2 if only chance were involved.

After the room designation, the number or alpha character designates the test number or sequence in that room, on that particular testing computer.

EXAMPLE: BRThree1 Bedroom number three, test number one.

The test scores are as follows:

COMPUTER 1

Laundry2	$z = 2.001$	$p < .022696$
Laundry3	$z = 2.273$	$p < .011513$
Laundry4	$z = 2.114$	$p < .017258$
Laundry5	$z = 2.894$	$p < .001901$
Office1	$z = 1.689$	$p < .045610$
Office4	$z = 3.146$	$p < .000828$
Office5	$z = 2.022$	$p < .021588$
MasterBath1	$z = 2.902$	$p < .001854$
MasterBath4	$z = 1.715$	$p < .043173$

COMPUTER 2

Den1	$z = 2.101$	$p < .017820$
Den2	$z = 2.56$	$p < .015541$
Den3	$z = 1.871$	$p < .030673$
Den5	$z = 2.104$	$p < .017689$
FrontRightBR1	$z = 1.955$	$p < .025292$
FrontRightBR2	$z = 2.100$	$p < .017684$
FrontRightBR3	$z = 2.510$	$p < .006037$

COMPUTER 3

APT-LivingRm2	$z = 3.917$	$p < .000044$
---------------	-------------	---------------

PART THREE

The Ovilus

Carl Jung, Swiss psychiatrist and the father of analytical psychiatry, coined the word “synchronicity”. Synchronicity - The experience of two or more events, that are apparently causally unrelated or unlikely to occur together by chance, that are observed to occur together in a meaningful manner.

This concept does not question or compete with the notion of causality. Instead, it maintains that just as events may be grouped by cause, they may also be grouped together by meaning. Since meaning is a complex mental construction, subject to both conscious and unconscious influence, not every correlation in the grouping of events by meaning needs to have an explanation of cause and effect.

NOTE: In the paranormal, there are many experiences which are noted and observed for which the laws of science, as we know and understand them at this time, cannot explain. In EVP studies, blank and sealed cassette tapes have been found to have EVP voices on them, without having been previously inserted into a recorder. The actual method of the sending of EVP voices remains unknown. Television sets, while turned off, have had faces of the deceased plainly visible, as if the set were on. Telephone calls with the caller having the voice and knowledge of a deceased individual have been heavily documented. Phone calls and text messages have been sent to cell phones which have no SIM card to properly receive calls, but do receive the anomalous calls. We simply do not know, at this time, exactly how these events occur or are possible.

In paranormal research, it is the reporting of these cases that is important. These and similar phenomena are reported by individuals who have never met or known each other, and live thousands of miles apart, and often hundreds of years. Yet the reports remain consistent. Case studies, in volume and over time, allow for hypotheses and theories. It is in this simple interests of reporting that this section is included.

The Ovilus is a device that intercepts EMF signals, and converts them to audio, from an internal dictionary of over 2,000 words. It is theorized that discarnate entities may be able to INFLUENCE, under some circumstances, this word selection process. It is not thought, in the majority, that these entities may exert 100% CONTROL over the word selection, and simple research and listening to the output of the device verifies this, to the normal and reasonable individual. It is also noted that coincidence may play a part in the process, with the probability of about 1 in 2,047, in getting a correct response to a direct question. It is only in the long term studies, with consistent reporting, that more exacting theories regarding coincidence versus influence may be formulated. Probability, from a math standpoint, rises sharply as valid answers are observed in larger quantity, over a brief period of time and small number of total responses. For example, the probability of getting two correct responses in a row is 1 in 4,190,209. ($1/2047 \times 1/2047$) This assumes there is only one correct response per each individual question.

The manufacturer of the Ovilus device indicates at the present time, there is insufficient data, science, and case study to indicate the Ovilus data should be evidential. This author agrees. This case study is not presented as hard evidence. It is presented so that others may have and consider its merits, or lack thereof. If no reporting is made, no theories may be formulated, or comparisons made with other reports to study correlations, if any. Each person who reads Part Three must consider this data in light of his own beliefs, or knowledge of events that are known

to have occurred to them personally. Beauty here is truly in the eye of the beholder, or its lack thereof.

SUMMARY OF INTRODUCTION - PART THREE - The data presented here on Part Three IS NOT CONSIDERED EVIDENTIAL by the manufacturer of the Ovilus device or the La. Spirits North Team. It is simply included in the interests of completeness of events, and for study/research purposes only.

CLOSING NOTES – PART THREE

There may have been additional incidents, or not. We have presented these incidents in Part Three in the interests of research and completeness of studies performed. It is acknowledged that answers may, in many cases, rely on judgment as to the accuracy of the answer. If the question, “Is the car red?” is posed, assuming the car’s color is not a transition color, the answer of either “yes” or “no” may be easily evaluated. Or, assuming no transition color, the answer to “What color is the car?”, the answer “red” may be easily evaluated. Others are not so simple, “Happy”, for example. And it is readily acknowledged that those hearing a response from an Ovilus device may NOT have sufficient knowledge to correlate a given answer as relevant or “correct”. The volume of comments received from the Ovilus device was very large, and there may be meanings that those of us not experiencing daily life at this home, or intimately familiar with its history, do not have a connotation for. The list is presented as received, in proper order, in the interest of completeness of research conducted. It is also noted that, although the words are spoken individually, there may be meanings or connotations in word groupings within word lists. These meanings or connotations may only be meaningful to certain individuals with the experiences to which these word phrases pertain, and not to all individuals. Words within the list that have an inordinate statistical frequency of appearance may also fall within the meaningful category, and need to be analyzed by those with a more intimate knowledge of the history of the location.

PART THREE**

PART FOUR

THE MODEL P-SB7 SPIRIT BOX

This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.

CLIP ONE This is from the garage apartment area. Bess asks, “Can you tell us what her name is?”. An immediate correct response is received, “Terri”.

CLIP TWO James is in the garage apartment and asks, “What is seven plus seven?”. An immediate response answers, “Fourteen”.

CLIP THREE This is from the garage apartment area. No interaction was intended at this time. Anomalous voice 1 comments, “Awesome”. Anomalous voice 2 asks, “What is it?”.

CLIP FOUR This contained profanity on the part of an anomalous voice, and is partly censored. This was recorded in the garage apartment. Bess had been repeatedly asking, “What is your name?”.

Voice 1: Devin

Voice 2: Fooled ya'!

Voice 3: F--- it!!

CLIP FIVE This was recorded in the living room, and was received as comments, rather than as an answer.

Voice 1: John

Voice 2: “Ask her.”

CLIP SIX This was recorded in the master bedroom. Bess asks for a “Doug or Mr. McInnis, or anybody else who may be here”.

Voice 1 Hello!

CLIP SEVEN This was taken in the master bedroom, in response to a request for names.

Voice 1: Bronson

Voice 2: Rosalyn **NOTE:** This voice seemed to be elderly, possible feeble-type voice.

Voice 3: Rest up!

CLIP EIGHT This was also recorded in the master bedroom, a class “C” EVP, difficult to hear, and subject to various interpretations. Voice 1 is a deep bass, and difficult to hear.

Voice 1: Is there any Catfish?

Voice 2: Many!

CLIP NINE This was recorded in the foyer. A female voice asks, “What to you want from me?”.

CLIP TEN This was also from the front foyer.

Voice 1: “What do they want?”

Voice 2: “Nothing.”

CLIP ELEVEN This was also recorded from the front foyer.

Voice: As a comment, “Don't know”.

CLIP TWELVE This is from the apartment.

Voice: “Help me. I can't leave right now”.

CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Eight EVP recordings were made of words formed on the P-SB7. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. The consciousness testing was strong, and consistent in many areas. We feel that the extensive audio noted, and the positive tests received in the PEAR testing are probably indicative of an anomalous presence or presences

We would like to thank the client for inviting us into her home, and for the opportunity to study the phenomena there. We would also like to thank her for her most gracious hospitality, and hope that we may be able to return there again soon.
