

## Investigation Summary Report

Private Residence  
Morgan City, LA

### HISTORY

In the quaint little town of Morgan City lies this private residence. Built approximately 40 years ago, this home stands on an area said to have been inhabited by the Chitamatcha Indians many years ago. Indian burial mounds found in the nearby areas date back to nearly 4,000 years! There is no documented history of anything abnormal taking place before the building of this home, however the current homeowners are quite sure of a "paranormal presence". For quite a number of years, the homeowners have reported furniture moving, the smell of cigarette smoke, and the sounds of children playing when none are around. On two very strange occasions, sightings of a mysterious woman with long black hair have been reported. No one knows who this woman was and it seemed as if she vanished just as quickly as she appeared. With all these reports, we were quite eager to investigate.

## INVESTIGATION

We kept this investigation to a bare minimum due to the size of the residence, with only Mark, Shelly, Raymond, Tiffany, and one DVR setup linking 4 IR cameras. We like to say that spirits do not work on a contract and you cannot always get them to "perform" on command. We also like to say ghost hunting can sometimes be as much fun/active as watching paint dry. Well, this was one of those cases! Unfortunately, no strange occurrences were reported personally or after the evidence analysis. However, we would like to personally thank the homeowners for being gracious enough to allow us in their home. We would also like to reassure them that if they continue to have any strange occurrences, we are always only a call away!
