

## Investigation Summary Report

### Private Residence Chickashaw, OK

### HISTORY

We made the long journey to Chickasha, OK on October 18, 2008 to investigate a house that had numerous reports of activity. People have reported seeing apparitions, hearing talking in a closet, hearing a baby crying, feeling hot and cold spots, hearing a tv on in the next room and walking in and it would be off, and being pushed down stairs.

We arrived on location around 4:00 PM to speak to a group of people interested in the paranormal. After a short presentation and after everyone left, we began to setup our equipment. We set up 1 dvr system with 5 IR cameras, 1 FLIR thermal camera, 1 Sony handheld, various EMF meters, several digital cameras, several digital voice recorders, and several digital thermometers. We broke into one group of two and one group of three. We then went to

different areas of the house to investigate. We stayed in each area about 35 minutes and then we would switch until every area of the house was covered. In the attic we had a few EMF spikes that we couldn't explain and heard a few weird noises. We ended our investigation around 2:00 PM but fortunately we got to keep our equipment set up all night because the owners were nice enough to let us stay in the house. We wrapped up about 8:00 AM the next morning and headed home.

After going over all of our evidence collected we did capture a few faint evp's and caught an EMF spike on the handheld!

We would like to thank Mark and Rebecca Spencer for allowing us to investigate their lovely home in Oklahoma and for allowing us to stay all night!
