Private Residence

Opelousas, LA

INVESTIGATION

(Report by Cimi Calvaruso)

This beautiful location was built in 1874 and it still has the same beauty as the day it was built. The current owners were complaining about doors that were locked but were always being opened by unseen hands. They are currently in the process of remodeling. They have had many things happening like tv was turned on after walking out. They have also said light bulbs are always burning out faster than normal.

When we first arrived I knew that the bathroom door was closed. I remember because I was admiring the original fixtures. When returning to the bathroom 10 minutes later the bathroom doors were completely opened. I asked everyone in the house if they opened it and they all replied no because they were upstairs with me.

Starting the investigation with EVP sessions we asking the spirits if we were allowed to take their pictures and one very loud reply was captured.."of course". This house was filled with many old treasures that were owned by the original owners. The new owners found letters stating the loss of two children. We were unable to find any activity to confirm this. But we truly felt their little spirits in the house. We are very grateful to the owners for letting us into this beautiful home and letting us explore and enjoy their home. We can say without a doubt this house is filled with many spirits because during a spiritbox session many voice came through. Thank you again for allowing us the pleasure of your home.
