

## Investigation Summary Report

### Private Residence

Quitman, LA

### HISTORY

NOTE: The client in this report has requested confidentiality. Some references in this report may have been obscured to protect the client's privacy. This in no way alters the data presented or the conclusions drawn herein.

DATE: September 29, 2009

PARTICIPANTS: Bess Maxwell, Kirk Cormier, John Combs

### BACKGROUND

The residence has been in a constant state of remodeling for several years. Mrs. M reports that she has experienced paranormal type activity at other places during her lifetime. In this particular residence, the clients report that the back bedroom has a heavy atmosphere, and a full body apparition was seen her, and also spoke to Mrs. M. In the children's bedroom, the boys see a "ghost", and a "mama ghost". The toys here are often turned on when the children are not home, or in the area. One small bed has been moved around in this room. Mrs. M also reports seeing an apparition behind the kitchen counter, the apparition appearing to be in military-type uniform. In the living room, when Mrs. M and her husband were seated on the sofa, a recliner chair, about six feet away, was rotated 90 degrees, and is not a swivel rocker/recliner. Organ music has been heard in the home when no televisions, radios, or other means of music were on. Mrs. M, who works in a guest care facility for the elderly, reports having seen and interacting with apparitions on that location, also.

EQUIPMENT: Digital infrared cameras and DVR system, digital still cameras, EMF meters including Tri-Fields, various digital audio recorders, motion detectors, and PEAR REG-1 unit for detection of the presence of anomalous consciousness with Hewlett-Packard computer.

## INVESTIGATION

EMF readings were normal during the investigation. At the times and places checked, no anomalous hot/cold spots were detected. No evidence was gathered with video or still photography.

Spontaneous Events: M, E, and investigators Bess Maxwell and Kirk Cormier were in the children's bedroom. The lights were out and the door was closed. A small light was observed, floating, but moving in a straight path. It would always appear behind, but close to, Kirk Cormier. The light was dim, but readily visible, lasting several seconds before fading. Cars passed outside during this time, and this light was not consistent w/ the observed phenomena. No other source could be found for a natural cause. The timer and data on audio recording revealed the following:

- 1st sighting: 10:03 PM, seen directly by M, and seen by Kirk Cormier as a reflection in his glasses.
- 2nd sighting: 10:32 PM, seen by M twice in quick succession.
- 3rd sighting: 10:33 PM, seen by all 4 persons
- 4th sighting: 10:44 PM, seen by M
- 5th sighting: 10:57 PM, seen by all except Kirk Cormier, as it appeared behind him.

The clients do not recall ever having seen this type light before. No natural source has been found, and no speculation as to its cause has been made, normal or paranormal.

Electronic Voice Phenomenon: Two anomalous voice recordings were gathered during the investigation.

1. In the children's bedroom, the two clients, Bess Maxwell, and Kirk Cormier, were present. Investigator Bess Maxwell says "James was the only one left". An anomalous voice comments, not otherwise heard except on the recording. The voice seems to say either "stand up", or "stand off". The fact that an anomalous voice was recorded is evident, even though the exact comment is not clear and is open to interpretation.
2. The two clients were present with Bess Maxwell and Kirk Cormier in the master bedroom. A voice, not otherwise heard, was recorded when the client says "He was trying to get to...". Again, the context is unclear, although it is apparent it is a voice.

Consciousness Detection, by Quantum Tunneling Method on Hewlett-Packard Computer:

In various locations and times during the investigation, a series of twenty-five tests were conducted for the presence of an anomalous consciousness, using statistical analysis of data gathered, using a REG-1 unit, software developed by Princeton University, and Hewlett-Packard computer. Reporting standard is excess of 95% for statistical evidence a non-chance event. Out of the 25 tests run, 5 were significant, and all above reporting standard. By chance, 1 graph could be expected, by chance alone, and 5 were obtained.

	Mean	Peak
Master Bath 1	2.013 p< .022057	3.155 p< .000802
Dining Room 1	1.923 p< .02724	2.373 p< .008822

Kitchen Counter Area 1	2.047	p< .020329	3.652	p< .00013
BR / Small Bed Area 1	2.100	p< .017864	2.589	p< .004813
BR / Small Bed Area 2	1.952	p< .025529	2.371	p< .00887

The area designated as “small bed” is the bed reported as moved/picked up and dropped repeated with no one visible to cause the movement.

In order for all five of the graphs to be caused by chance, as opposed to being anomalous, the probability is as follows:

Mean data: p< .00000000557  
Peak data: p< .00000000000003967

## CONCLUSION

Clients are normal, reasonable, intelligent, and are concerned for the safety of the children and the household. Their reports are clear, show good recall, and consistent. At the time, and in the places tested, only 2 anomalous EVP’s were gathered. In the consciousness testing, a high statistical correlation was made for the passive presence of an anomalous presence. No other hard scientific data was gathered at that particular area or time.

Given the quantity of data reported, and the above information, it is possible there is an anomalous presence in the home. Analyzing the reported incidents, there seems to be no harmful activity or overt threats. Should such occur, the clients are urged to contact La. Spirits immediately.

We also encourage the clients to allow La. Spirits to conduct follow up studies, to see if more data can be gathered to further explain the activity that has been noted. We would like to thank the clients for allowing La. Spirits to be guests in their home, and for allowing us to conduct this investigation.
