**NOTE: THE CLIENTS IN THIS INVESTIGATION HAVE REQUESTED
CONFIDENTIALITY. SOME OF THE DATA IN THIS REPORT MAY HAVE BEEN
OBSCURED TO HONOR THEIR REQUEST. THIS IN NO WAY AFFECTS THE DATA
PRESENTED, OR ANY CONCLUSIONS HEREIN. NO PHOTOS OF THE INTERIOR OR
THE EXTERIOR OF THE RESIDENCE HAVE BEEN INCLUDED.**

HISTORY

This home is an older home, wood and on pier and beam construction. The current owner and his family have owned this home for many years. It has been utilized for rental property in its recent history. Many of the past tenants of the property have reported anomalous experiences on a regular basis. Two of the previous tenants have lived alone, and died in the home. One passed away, and the body was found several days later in the hallway. Another tenant passed away, falling onto the living room floor, this body also found several days after death.

EXPERIENCES

The clients, tenants, have experienced paranormal activity in this home since moving in. Objects have been moved, and tossed. A TV remote controller, placed on the TV set, was propelled across the room, cause not known, and this was observed personally by multiple adult witnesses. Doors open anomalous when the latch is secure, and doors are closed with the latch caught, on a regular basis. Door knobs are observed to turn, with no one around to effect the turning. Shadow figures are observed in various areas. The client, in bed, felt the covers being tucked around and under her, and could find no one in the area to have done so. The front bedroom is said to have a heavy atmosphere, with a feeling of dread or fear. Music is heard, which seems to originate from the inside of the walls; no radios are present in the home. Footsteps are heard in various areas. Voices are heard within the home calling the clients' names, with neither of the clients calling out to the other at the time.

INVESTIGATION

DATE OF INVESTIGATION: November 9th, 2012

PARTICIPANTS: BESS MAXWELL, JOHN COMBS, CONNIE WILLIAMSON, KIRK CORMIER, JAMES PALMER

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, REM-Pod, Various EMF meters including Tri-Fields, Motion detectors including geophone and laser grid systems, Ovilus interactive voice communications device, and PEAR REG-1 units for the detection of anomalous human consciousness with software on Hewlett-Packard computers.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. High EMF fields were noted both inside and outside the home. These could cause false perceptions with certain sensitive individuals, over a period of time, varying by the individual. The fields are believed to be caused by high strength electrical lines near the home. We do not believe these to be the cause of all the reported

perceptions, but could be the cause of some.

No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Two standard digital EVP voices were recorded. No EVP clips were formed using the P-SB7.

A limited amount of data was recorded from the Ovilus device. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. Consciousness testing was strong and consistent.

PERSONAL EXPERIENCE – JOHN COMBS

Although the home seems to have a pervasive EMF field, it seems to be in a fairly narrow range. At 6:05 PM, and again at 6:10 PM, two spikes were noted by Tri-field EMF meter, each spike about 8 milligauss in size, lasting about 2 seconds, then returning to background. These were noted in the dining area, as I was standing still, and holding the meter stationary. There were no electrical devices being turned on or off in the area, or in the home, as I was alone at the time. I tested this area throughout the evening, and no additional spikes were noted.

PART TWO

Consciousness Detection

This type of testing is passive in nature and designed to detect, through the quantum tunneling method, the probability that a human type consciousness may be present affecting the REG-1 units, when all incarnate consciousness has been removed from the areas of testing.. The minimum reporting standard for this type testing is $p < .05$, with p (probability) representing the chance that the event could be the result of chance alone in the probability distribution. Thus, the probability of an anomaly is 95% per test, or greater, to be considered statistically significant. We then compute the probability that all tests are false, that is, that none of the tests indicate an anomaly.

A total of 40 tests were run in all areas. At the minimum reporting standard of .05, we would expect to receive a total of 2.0 positives due to chance alone affecting the probability distribution, resulting in 2.0 false positives for the human consciousness being the cause. ($40 \times .05 = 2.0$) The actual mean score for the 23 positive tests was $p < .022714$. The correction for the number of expected false positives would be $40 \times .022714 = .90$ false positives, as 1.0 As noted, we received 23 positives, much greater than the mathematically expected 1 if only chance were involved.

After the room designation, the number or alpha character designates the test number or sequence in that room, on that particular testing computer.

EXAMPLE: BRThree1 Bedroom number three, test number one.

The test scores are as follows:

COMPUTER 1

Master Bedroom 1	$z = 2.245$	$p < .012384$
Laundry 3	$z = 2.029$	$p < .021229$
Laundry 4	$z = 2.517$	$p < .005918$

COMPUTER 2

Bedroom One 2	$z = 2.066$	$p < .019414$
Bedroom One 3	$z = 1.953$	$p < .025410$
Bedroom One 4	$z = 2.007$	$p < .022375$
Bedroom One 5	$z = 1.704$	$p < .044191$
Living Room 3	$z = 1.807$	$p < .035381$
Living Room 5	$z = 2.007$	$p < .022375$

COMPUTER 4

Bath 1	$z = 2.116$	$p < .017172$
Bath 2	$z = 2.414$	$p < .007889$
Bath 4	$z = 1.892$	$P < .029145$
Bath 5	$z = 2.627$	$p < .004307$
Living Room 2	$z = 2.106$	$p < .017602$
Living Room 4	$z = 1.800$	$p < .035930$

PART THREE

The Ovilus

Carl Jung, Swiss psychiatrist and the father of analytical psychiatry, coined the word “synchronicity”. Synchronicity - The experience of two or more events, that are apparently causally unrelated or unlikely to occur together by chance, that are observed to occur together in a meaningful manner.

This concept does not question or compete with the notion of causality. Instead, it maintains that just as events may be grouped by cause, they may also be grouped together by meaning. Since meaning is a complex mental construction, subject to both conscious and unconscious influence, not every correlation in the grouping of events by meaning needs to have an explanation of cause and effect.

NOTE: In the paranormal, there are many experiences which are noted and observed for which the laws of science, as we know and understand them at this time, cannot explain. In EVP studies, blank and sealed cassette tapes have been found to have EVP voices on them, without having been previously inserted into a recorder. The actual method of the sending of EVP voices remains unknown. Television sets, while turned off, have had faces of the deceased plainly visible, as if the set were on. Telephone calls with the caller having the voice and knowledge of a deceased individual have been heavily documented. Phone calls and text messages have been sent to cell phones which have no SIM card to properly receive calls, but do receive the anomalous calls. We simply do not know, at this time, exactly how these events occur or are possible.

In paranormal research, it is the reporting of these cases that is important. These and similar phenomena are reported by individuals who have never met or known each other, and live thousands of miles apart, and often hundreds of years. Yet the reports remain consistent. Case studies, in volume and over time, allow for hypotheses and theories. It is in this simple interests of reporting that this section is included.

The Ovilus is a device that intercepts EMF signals, and converts them to audio, from an internal dictionary of over 2,000 words. It is theorized that discarnate entities may be able to INFLUENCE, under some circumstances, this word selection process. It is not thought, in the majority, that these entities may exert 100% CONTROL over the word selection, and simple research and listening to the output of the device verifies this, to the normal and reasonable individual. It is also noted that coincidence may play a part in the process, with the probability of about 1 in 2,047, in getting a correct response to a direct question. It is only in the long term studies, with consistent reporting, that more exacting theories regarding coincidence versus influence may be formulated. Probability, from a math standpoint, rises sharply as valid answers are observed in larger quantity, over a brief period of time and small number of total responses. For example, the probability of getting two correct responses in a row is 1 in 4,190,209. (1/2047 x 1/2047) This assumes there is only one correct response per each individual question.

The manufacturer of the Ovilus device indicates at the present time, there is insufficient data, science, and case study to indicate the Ovilus data should be evidential. This author agrees. This case study is not presented as hard evidence. It is presented so that others may have and consider its merits, or lack thereof. If no reporting is made, no theories may be formulated, or comparisons made with other reports to study correlations, if any. Each person who reads Part Three must consider this data in light of his own beliefs, or knowledge of events that are known

to have occurred to them personally. Beauty here is truly in the eye of the beholder, or its lack thereof.

SUMMARY OF INTRODUCTION - PART THREE - The data presented here on Part Three IS NOT CONSIDERED EVIDENTIAL by the manufacturer of the Ovilus device or the La. Spirits North Team. It is simply included in the interests of completeness of events, and for study/research purposes only.

PART FOUR

THE MODEL P-SB7 SPIRIT BOX

This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.

NO DATA GATHERED FROM THE P-SB7

**STANDARD DIGITAL AUDIO RECORDING
NO INTENTIONAL ENERGY ADDED**

Two clips, both recorded by Connie Williamson.

CLIP ONE: Bess Maxwell and Connie Williamson, in the hallway. Bess Maxwell had just said Last Rites for the individual that had passed away there.

Anomalous Voice: “Can you help?”

CLIP TWO: Same as above.

Anomalous Voice: “Who is that?”

PART FIVE

DAUZAT REPORT

THEORETICAL EFFECTS OF ENVIRONMENTAL ENERGY ON PARANORMAL PHENOMENA

Over many years, there seem to be consistent reports from individuals who live many miles, and often, many years apart concerning a correlation between extra energy in the environment and a perceived increase in paranormal activity. It is readily acknowledged that the sun is the greatest source of energy in our solar system, and this energy is in a constant state of flux. When solar energy is increased through solar flares, and other types of solar activity, the number of reports of paranormal activity increases. These flares and eruptions cause x-ray events, radio events, proton flux, electron flux, and geomagnetic impulses. It is readily acknowledged that these effect everything on our planet from weather, to satellite communications, disruptions in electrical grids, and even the flow in pipelines. These events also result in what is known as geomagnetic induced currents (gic) or telluric currents in the earth's crust, and waterways. These electrical flows tend to go toward the sun in general, as well as toward the equator in the daytime, and the poles at night.

We do not, at this time, totally understand how environmental energy sources can effect paranormal phenomena in a direct manner, or even if they do. Also, this author readily concedes that if paranormal activity is increased by local energy, that solar energy is not the only available source of local energy; it is just the most prevalent. If this relationship does exist, it would support the general observations of myself and others of a propensity of paranormal activity to be detectable in areas where water and large quartz deposits are found, as these would be conductors for the telluric currents, thus making energy readily available.

This author feels that in order to perform research on the correlations of solar weather and paranormal activity, long term case studies offer the best method, as of this time, to find support, or to deny, this hypothesis. Therefor, data concerning solar weather for the date of our paranormal investigations will be supplied, with no efforts made to draw conclusions thereof, either positive or negative. This data is provided by the National Oceanic and Atmospheric Administration. The NOAA also readily states that the total effects of space weather on live biological entities on planet earth is not known or understood at this time, either.

If an attached graph does not show activity on the date and/or time of our investigation, it does not mean that there was no solar activity, but the the solar activity at this time was considered normal.

CONCLUSION: This data is not meant to conclusively show that any paranormal activity, or lack thereof, found on our investigation was caused by the solar activity at that time, but that there could possibly have been an influence by the solar weather at this time, positively or negatively correlated to the strength of such solar weather. Other such energy systems as lunar cycles, thunderstorms, and utility networks may provide an alternative energy supply for paranormal phenomena.

Space Weather Alerts and Warnings Timeline

**NOTE: DATE OF INVESTIGATION 11/09/2012
AT TIMES OF TESTING, CONDITIONS WERE NORMAL.**

END OF PART FIVE

CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from appliances and electrical devices. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. No EVP voices were made of words formed from the P-SB7. Two standard EVP clips by normal digital recording were noted. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. The consciousness testing was strong, and consistent in many areas. The Ovilus data was limited in quantity, though we are not sufficiently familiar with the residence and family dynamics to draw any conclusions from this data. Consciousness testing was strong and consistent. We feel that these experiences, and the positive tests received are probably indicative of an anomalous presence or presences, and that these do not seem malicious or harmful in any way.

We would like to thank the clients for inviting us into their home, and for the opportunity to study the phenomena there. We would also like to thank them for their most gracious hospitality, and hope that me may be able to return there again soon.
