

Investigation Summary Report

Smythe Residence Leeseville, LA

HISTORY

Once the property of Vernon Parish's first District Judge, Nathan M. Brey (whom was murdered on the property), the Smythe's Property/Residence was quite an eventful investigation. The property consist of an inhabited mobile home by Donnie & Judy Smythe. Also on the lot is an unused home once owned by Donnie and his deceased ex wife, who seems to be the most active of the spirits that reside here, seeming to tease and taunt Judy. Lastly, is the abandoned mobile home of Donnie's deceased aunt, who passed away in the home. Prior to the actual investigation, I had made several preliminary visits, taking photos and taking sound recordings. It was obvious after getting class A EVPs at 10am, this place was going to be good! The group arrived for the investigation, set up the equipment, and dispatched to their assigned areas.

Early into the night, Steve and I were sitting alone in the main house. We sat back and relaxed, trying to pick up on anything. We began to hear what sounded like muffled whispering coming down the hallway. As we heard this, our feet began to feel the vibrations of footsteps coming down the hallway, getting closer and closer. At this time, I took a photograph (seen below), which shows some type of shadowed obstruction in the middle of the picture.

We then began monitoring the infrared cameras, which showed a barrage of "orb" like shapes flying in very planned patterns, not like the usual dust or insect. We began taking EMF readings in Judy's bedroom, which according to her, is the most active area. It wasn't long after we began asking questions that we started getting very good EMF spikes. At one point, I actually followed

one around the room, leading me into Judy. Several of us reported that when the EMF spikes would take place, we would begin feeling light-headed and, at one point, got the intense smell of cigar smoke! As you will see with our evidence, especially EVPs, this place is quite active. We are planning a return trip in the near future, this time accompanied by a documentary film-maker, doing a film on deceased family members and their residual affects on the living loved ones. We will inform you of any happenings as they take place!

After the investigation, I made another visit, only this time I was accompanied by a friend who is quite sensitive. He quickly picked up on a female spirit in Judy's home. She posed no threat and seemed to be there strictly for Judy's annoyance. The second, was of a male figure picked up in the main house. This one made himself quite scarce when we entered the home. Finally, a very slight detection was made of a young girl in the main home.
