

# **INVESTIGATION SUMMARY REPORT**

**PRIVATE RESIDENCE  
WEST MONROE, LA.**

**JOHN COMBS  
CASE MANAGER  
LOUISIANA SPIRITS  
NORTH TEAM**

**NOTE: THE CLIENTS IN THIS INVESTIGATION HAVE ALLOWED OPEN AND REASONABLE DISCLOSURE OF DATA GATHERED BY LA. SPIRITS ON THE INVESTIGATION IN THEIR HOME. SOME DATA MAY HAVE BEEN OBSCURED IF DEEMED A POTENTIAL INVASION OF REASONABLE PRIVACY. THIS IN NO WAY ACCEFFECTS THE DATA PRESENTED, OR THE CONCLUSIONS HEREIN.**

# HISTORY

This home is a double-wide mobile home, in the family for several years, and has housed several generations of the family at various times. The inside consists of three bedrooms, living room, kitchen, 2 bathrooms, and a hallway.

# EXPERIENCES

The home is currently occupied by the client, her mother, her children, and grandchildren. The client, her mother, and her daughter report the following:

Three adult males, and an infant male have died on the property. A teenage boy, brother to the client, committed suicide in the back bedroom several years ago. The client's father passed away in his bedroom of natural causes. The clients' grandfather died in another mobile home located on the property. An infant son of the client passed away of unknown causes, the autopsy finding no cause of death.

The TV's in the residence act in an unusual manner, both in turning themselves on, and in their manner of performance. The TV in the living room has repeatedly gone to channel 666 with no one in the area of the set, or the remote control. Cell phones left unattended have been found with the number 666 keyed in.

Objects are often moved around in the home, with no one home to do so.

The sounds of running footsteps are heard.

The client's 4 year-old daughter sees "monsters", and when asked to describe them, very closely describes the client's grandfather, mentioned above. The grandfather died before the children were born.

The client reports occasionally feeling a warmth running down the front of her stomach which feels like warm water flowing downward. The client reports that each time she experiences this, that something strange or violent occurs. Some of these include her hand being shoved into an ice maker requiring extraction by the fire department, being punched, knocked down in the bathtub requiring a trip to the emergency room, and her husband's truck exploding and burning in the front yard.

# INVESTIGATION

DATE OF INVESTIGATION: August 25<sup>th</sup>, 2012

PARTICIPANTS: BESS MAXWELL, KEITH MYERS, TRACI MYERS, JOHN COMBS, CONNIE WILLIAMSON, KIRK CORMIER

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, Various EMF meters including Tri-Fields, Motion detectors including geophone and laser grid systems, Ovilus interactive voice communications device, and PEAR REG-1 units for the detection of anomalous human consciousness with software on Hewlett-Packard computers.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure. Natural EMF was noted in expected locations, but was very low. One anomalous spike was noted in the living room. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Three EVP voices were recorded, and two EVP phrases formed using the P-SB7.

A limited amount of data was recorded from the Ovilus device. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. No inordinate positive ion counts were noted.

## PERSONAL EXPERIENCES

Bess Maxwell, witnessed by Keith Myers, Traci Myers, Connie Williamson, and Kirk Cormier, recorded one brief EMF spike in the living room, with no natural cause evident or found. EMF fields in this residence were extremely low.

Bess Maxwee, while seated in the living room with the above-mentioned individuals, observed s three dimensional, gold-glowing orb in the kitchen that moved around in the area of the kitchen sink. The gold sphere seemed to emit its own light, and was three dimensional as opposed to two dimensional from a light shining on a wall, cabinet, etc.

The same four investigators were in the back bedroom, and experienced a feeling of heavy or intense atmosphere. The feeling was not noted in any other area of the residence, at any other time.

# PART TWO

## Consciousness Detection

This type of testing is passive in nature and designed to detect, through the quantum tunneling method, the probability that a human type consciousness may be present affecting the REG-1 units, when all incarnate consciousness has been removed from the areas of testing.. The minimum reporting standard for this type testing is  $p < .05$ , with  $p$  (probability) representing the chance that the event could be the result of chance alone in the probability distribution. Thus, the probability of an anomaly is 95% per test, or greater, to be considered statistically significant. We then compute the probability that all tests are false, that is, that none of the tests indicate an anomaly.

A total of 42 tests were run in all areas. At the minimum reporting standard of .05, we would expect to receive a total of 2.1 tests ( rounded up to 3.0) due to chance alone affecting the probability distribution, resulting in 2.1 (3.0) false positives for the human consciousness being the cause. ( $42 \times .05 = 2.1$ ) The actual mean score for the 20 positive tests was  $p < .020229$ . The correction for the number of expected false positives would be  $42 \times .024225 = .85$  false positives, which we would round up to 1. As noted, we received 20 positives, much greater then the mathematically expected 1 if only chance were involved.

After the room designation, the number or alpha character designates the test number or sequence in that room, on that particular testing computer.

EXAMPLE: BRThree1 Bedroom number three, test number one.

The test scores are as follows:

### COMPUTER 1

Main Bath 3	$z = 1.921$	$p < .027336$
Main Bath 5	$z = 2.003$	$p < .022589$
Hall/Laundry 1	$z = 2.015$	$p < .021952$
Hall/Laundry 2	$z = 2.237$	$p < .012643$
Hall/Laundry 3	$z = 2.474$	$p < .006680$

### COMPUTER 2

Master Bedroom 2	$z = 1.976$	$p < .024077$
Master Bedroom 3	$z = 1.843$	$p < .032665$
Kitchen 3	$z = 2.986$	$p < .001413$
Kitchen 4	$z = 2.127$	$p < .016710$

### COMPUTER 4

Master Bath 4	$z = 1.765$	$p < .038782$
Master Bath 5	$z = 1.842$	$p < .032738$
Master Bath 6	$z = 2.357$	$p < .009212$
Master Bath 7	$z = 2.655$	$p < .003965$
Living Room 1	$z = 1.834$	$p < .033327$
Living Room 2	$z = 2.302$	$p < .010667$

## COMPUTER 5

Middle Bedroom 4	$z= 2.343$	$p< .009564$
Bedroom – Right 1	$z= 1.800$	$p< .035930$
Bedroom – Right 3	$z= 2.365$	$p< .009015$
Bedroom – Right 4	$z= 1.765$	$p< .038782$
Bedroom – Right 5	$z= 2.113$	$p< .017300$

The probability that these 20 tests are all false positives, due to chance alone in the probability distributions, and not indicative of human consciousness interaction when none incarnate was present to do so, through quantum tunneling is:

### PROBABILITY

**END**  
**PART TWO**

## PART THREE

### The Ovilus

*Carl Jung, Swiss psychiatrist and the father of analytical psychiatry, coined the word “synchronicity”. Synchronicity - The experience of two or more events, that are apparently causally unrelated or unlikely to occur together by chance, that are observed to occur together in a meaningful manner.*

*This concept does not question or compete with the notion of causality. Instead, it maintains that just as events may be grouped by cause, they may also be grouped together by meaning. Since meaning is a complex mental construction, subject to both conscious and unconscious influence, not every correlation in the grouping of events by meaning needs to have an explanation of cause and effect.*

**NOTE: In the paranormal, there are many experiences which are noted and observed for which the laws of science, as we know and understand them at this time, cannot explain. In EVP studies, blank and sealed cassette tapes have been found to have EVP voices on them, without having been previously inserted into a recorder. The actual method of the sending of EVP voices remains unknown. Television sets, while turned off, have had faces of the deceased plainly visible, as if the set were on. Telephone calls with the caller having the voice and knowledge of a deceased individual have been heavily documented. Phone calls and text messages have been sent to cell phones which have no SIM card to properly receive calls, but do receive the anomalous calls. We simply do not know, at this time, exactly how these events occur or are possible.**

**In paranormal research, it is the reporting of these cases that is important. These and similar phenomena are reported by individuals who have never met or known each other, and live thousands of miles apart, and often hundreds of years. Yet the reports remain consistent. Case studies, in volume and over time, allow for hypotheses and theories. It is in this simple interests of reporting that this section is included.**

**The Ovilus is a device that intercepts EMF signals, and converts them to audio, from an internal dictionary of over 2,000 words. It is theorized that discarnate entities may be able to INFLUENCE, under some circumstances, this word selection process. It is not thought, in the majority, that these entities may exert 100% CONTROL over the word selection, and simple research and listening to the output of the device verifies this, to the normal and reasonable individual. It is also noted that coincidence may play a part in the process, with the probability of about 1 in 2,047, in getting a correct response to a direct question. It is only in the long term studies, with consistent reporting, that more exacting theories regarding coincidence versus influence may be formulated. Probability, from a math standpoint, rises sharply as valid answers are observed in larger quantity, over a brief period of time and small number of total responses. For example, the probability of getting two correct responses in a row is 1 in 4,190,209. (1/2047 x 1/2047) This assumes there is only one correct response per each individual question.**

**The manufacturer of the Ovilus device indicates at the present time, there is insufficient data, science, and case study to indicate the Ovilus data should be evidential. This author agrees. This case study is not presented as hard evidence. It is presented so that others may have and consider its merits, or lack thereof. If no reporting is made, no theories may be formulated, or comparisons made with other reports to study correlations, if any. Each person who reads Part Three must consider this data in light of his own beliefs, or knowledge of events that are known**

to have occurred to them personally. Beauty here is truly in the eye of the beholder, or its lack thereof.

**SUMMARY OF INTRODUCTION - PART THREE - The data presented here on Part Three IS NOT CONSIDERED EVIDENTIAL by the manufacturer of the Ovilus device or the La. Spirits North Team. It is simply included in the interests of completeness of events, and for study/research purposes only.**

## **THE MODEL P-SB7 SPIRIT BOX**

**This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.**

**CLIP ONE: Five researchers in the living room.**

**Bess Maxwell: “What is your name?”**

**TWO male voices answer, both saying “Ed”.**

**CLIP TWO: 5 researchers, in Travis' room.**

**Bess Maxwell, “Can anybody in here talk to us?”**

**Anomalous voice: “Travis”.**

### **STANDARD EVP**

**No Intentionally Added Energy Sources**

**CLIP ONE: Recorded by Kirk Cormier.**

**Keith Myers comments, “Tomorrow”.**

**Traci Myers agrees, “Yeah”.**

**Anomalous female voice: “Yeah”.**

**CLIP TWO: Recorded by Traci Myers.**

**Anomalous voice greets with, “Hey!”.**

**CLIP THREE: Recorded by Traci Myers.**

**Bess Maxwell and Connie Williamson are laughing at a comment, and Bess agrees with the comment by stating, “Yeah”.**

**Anomalous voice indicates, “STOP IT”.**

# **PART FIVE BROWN REPORT**

## **THEORETICAL EFFECTS OF ENVIRONMENTAL ENERGY ON PARANORMAL PHENOMENA**

Over many years, there seem to be consistent reports from individuals who live many miles, and often, many years apart concerning a correlation between extra energy in the environment and a perceived increase in paranormal activity. It is readily acknowledged that the sun is the greatest source of energy in our solar system, and this energy is in a constant state of flux. When solar energy is increased through solar flares, and other types of solar activity, the number of reports of paranormal activity increases. These flares and eruptions cause x-ray events, radio events, proton flux, electron flux, and geomagnetic impulses. It is readily acknowledged that these effect everything on our planet from weather, to satellite communications, disruptions in electrical grids, and even the flow in pipelines. These events also result in what is known as geomagnetic induced currents (gic) or telluric currents in the earth's crust, and waterways. These electrical flows tend to go toward the sun in general, as well as toward the equator in the daytime, and the poles at night.

We do not, at this time, totally understand how environmental energy sources can effect paranormal phenomena in a direct manner, or even if they do. Also, this author readily concedes that if paranormal activity is increased by local energy, that solar energy is not the only available source of local energy; it is just the most prevalent. If this relationship does exist, it would support the general observations of myself and others of a propensity of paranormal activity to be detectable in areas where water and large quartz deposits are found, as these would be conductors for the telluric currents, thus making energy readily available.

This author feels that in order to perform research on the correlations of solar weather and paranormal activity, long term case studies offer the best method, as of this time, to find support, or to deny, this hypothesis. Therefor, data concerning solar weather for the date of our paranormal investigations will be supplied, with no efforts made to draw conclusions thereof, either positive or negative. This data is provided by the National Oceanic and Atmospheric Administration. The NOAA also readily states that the total effects of space weather on live biological entities on planet earth is not known or understood at this time, either.

If an attached graph does not show activity on the date and/or time of our investigation, it does not mean that there was no solar activity, but the the solar activity at this time was considered normal.

**CONCLUSION:** This data is not meant to conclusively show that any paranormal activity, or lack thereof, found on our investigation was caused by the solar activity at that time, but that there could possibly have been an influence by the solar weather at this time, positively or negatively correlated to the strength of such solar weather. Other such energy systems as lunar cycles, thunderstorms, and utility networks may provide an alternative energy supply for paranormal phenomena.

# Space Weather Alerts and Warnings Timeline

**NOTE: DATE OF INVESTIGATION 08/25/2012**

**SPACE WEATHER CONDITIONS WERE NORMAL AT THE TIME OF RESEARCH.**

**END OF PART FIVE**

# CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Two recordings were made of words formed by the P-SB7, and three EVP voices were obtained. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. The consciousness testing was strong, and consistent in many areas. We feel that the personal experiences, the extensive audio noted, and the positive tests received in the PEAR testing are probably indicative of an anomalous presence or presences

We would like to thank the clients for inviting us into their home, and for the opportunity to study the phenomena there. We would also like to thank them for their most gracious hospitality, and hope that me may be able to return there again soon.

John Combs
