CONCLUSION

Due to the lack of evidence collected, LaSpirits can neither prove nor debunk the claims of the clients. It was also determined that an electrical sub station is located directly across the street causing seriously high EMG throughout the home. Such high EMF can be directly related to a lot of the claims. We advised the physical and mental problems that can also be related as well.

We would like to thank the clients for inviting us into their home, and for the opportunity to attempt to study the phenomena there. We would also like to thank them for their most gracious hospitality.
