## Summary Report

### The Den Alexandria, LA

#### HISTORY/INVESTIGATION

Located in downtown Alexandria, LA, The Den was built in 1896 and was used as a jewelry store and then went into disrepair. The new owner is getting the building back up to working order, the entire city of Alexandria is trying to revitalize the city and in the downtown area. We arrived around 7:15 pm and started our investigation. We were directed to the upstairs as having the most activity so we centered around that and we also was shown how noise was coming from the stairway and footsteps could be heard. We used our equipment but was a quite night, I then discovered that when the wind would blow off the main street and the Red River that it would make noise. If you were sitting in direct relation to the office and the stairs are behind you and the window behind that it would sound like steps from the stairwell. We then put some cardboard in the window cracks on the frame and the so called footsteps stopped. We wrapped up investigation hours later with no evidence and or recordings on the real time EVP recorder. We then checked out and did a session in the kitchen area and found the table to be crooked and stuff falls off due to it being unstable. No more evidence was found in the kitchen and so we concluded our investigation with no verifiable validations to confirm that The Den contained any paranormal activity.
