

**INVESTIGATION SUMMARY REPORT
YMCA BUILDING
400 McNEIL ST.
SHREVEPORT, LA. 71101**

**BESS MAXWELL
CASE MANAGER
LOUISIANA SPIRITS
NORTH TEAM**

NOTE: THE CLIENTS IN THIS INVESTIGATION HAVE ALLOWED OPEN AND REASONABLE DISCLOSURE OF DATA GATHERED BY LA. SPIRITS ON THE INVESTIGATION IN THIS BUILDING. SOME DATA MAY HAVE BEEN OBSCURED IF DEEMED A POTENTIAL INVASION OF REASONABLE PRIVACY. THIS IN NO WAY ACCEFACTS THE DATA PRESENTED, OR THE CONCLUSIONS HEREIN.

HISTORY

This home is manufactured home, approximately fifteen years of age. It is located in a rural area of Bossier Parish in the Sligo Road area. The land also has a building for automotive body repair, in addition to the residence. There are vintage and collectible vehicles on the site, with their exact history unknown and unknowable. The clients have noted unusual events only in the last 6 to 8 months.

EXPERIENCES

The clients have observed shadow-like forms, and generally seemed to be of male form. Voices are heard in the home, often calling the specific name of family members, with no one in the area of voice origination. Footsteps are distinctly heard, and doors are observed and heard opening as well as closing, with no one in the area to do so. This includes cabinet doors in the kitchen and dining areas, as well as the laundry room door. Electronic devices are turned on and off with no one in the area to perform this function. Distinctly cold spots are noted in the area of the master bedroom, generally close to the bed. The tactile sensation of bed covers being tugged during the night is felt, along with voices whispered in the ear. There is, in various areas, the olfactory sensation of floral/lavender fragrances, reminiscent of the perfumes of earlier years.

Anomalous figures have been observed in the front yard of the residence, as well as the entry door to the body shop located on the property.

INVESTIGATION

DATE OF INVESTIGATION: November 14th, 2015

PARTICIPANTS: BESS MAXWELL, JOHN COMBS, CONNIE WILLIAMSON, KIRK CORMIER, JAMES PALMER, KEITH MYERS, AND TRACI MYERS

EQUIPMENT: Digital Cameras, Infrared cameras and DVR systems, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, REM-Pod, Various EMF meters including Tri-Fields, Motion detectors including geophone and laser grid systems, Ovilus interactive voice communications device, and PEAR REG-1 units for the detection of anomalous human consciousness with software on Hewlett-Packard computers.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC

current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from appliances. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. No standard EVP voices were recorded, and eight EVP voices formed using the P-SB7 were recorded.

A limited amount of data was recorded from the Ovilus device. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. No EMF fields from natural sources were found in areas where exposure could cause false positive impressions.

PERSONAL EXPERINCES

At various times of the night, all team members heard distinct footsteps on the third floor, when neither team members or staff from the building were on the third floor. I (John Combs) heard this several times coming from empty rooms on the third floor, only one or two rooms away from me. Immediate inspection noted no one in the room, or anyone else on that floor other than me.

PART TWO

Consciousness Detection

This type of testing is passive in nature and designed to detect, through the quantum tunneling method, the probability that a human type consciousness may be present affecting the REG-1 units, when all incarnate consciousness has been removed from the areas of testing.. The minimum reporting standard for this type testing is $p < .05$, with p (probability) representing the chance that the event could be the result of chance alone in the probability distribution. Thus, the probability of an anomaly is 95% per test, or greater, to be considered statistically significant. We then compute the probability that all tests are false, that is, that none of the tests indicate an anomaly.

A total of 20 tests were run on three floors. At the minimum reporting standard of .05, we would expect to receive a total of 1.0 tests due to chance alone affecting the probability distribution, resulting in 1.0 false positives for the human consciousness being the cause. ($20 \times .05 = 1.0$) The actual mean score for the 10 positive tests was $p < .021303$. The correction for the number of expected false positives would be $20 \times .021303 = .43$ false positives, less than one. As noted, we received 10 positives, much greater than the mathematically expected 1 if only chance were involved.

After the floor designation, the number or alpha character designates the test number or sequence in that room, on that particular testing computer.

EXAMPLE: 1FTWO First floor, test two

The test scores are as follows:

COMPUTER 7

1F Three	$z = 3.214$	$p < .000654$
1F Four	$z = 2.020$	$p < .021692$

COMPUTER 8

2F Seven	$z = 2.886$	$p < .001950$
2F Nine	$z = 1.976$	$p < .024077$
2F Ten	$z = 1.907$	$p < .028260$

COMPUTER 6

3F Thirteen	$z = 2.232$	$p < .012807$
3F Fourteen	$z = 1.865$	$p < .031091$

COMPUTER 4

3F Sixteen	$z = 1.785$	$p < .001950$
3F Seventeen	$z = 1.976$	$p < .024077$
3F Twenty	$z = 2.054$	$p < .019988$

NOTE: Tests are numbered sequentially, one through twenty.

The probability that these 10 tests are all false positives, due to chance alone in the probability

The Ovilus

Carl Jung, Swiss psychiatrist and the father of analytical psychiatry, coined the word “synchronicity”. Synchronicity - The experience of two or more events , that are apparently causally unrelated or unlikely to occur together by chance, that are observed to occur together in a meaningful manner.

This concept does not question or compete with the notion of causality. Instead, it maintains that just as events may be grouped by cause, they may also be grouped together by meaning. Since meaning is a complex mental construction, subject to both conscious and unconscious influence, not every correlation in the grouping of events by meaning needs to have an explanation of cause and effect.

NOTE: In the paranormal, there are many experiences which are noted and observed for which the laws of science, as we know and understand them at this time, cannot explain. In EVP studies, blank and sealed cassette tapes have been found to have EVP voices on them, without having been previously inserted into a recorder. The actual method of the sending of EVP voices remains unknown. Television sets, while turned off, have had faces of the deceased plainly visible, as if the set were on. Telephone calls with the caller having the voice and knowledge of a deceased individual have been heavily documented. Phone calls and text messages have been sent to cell phones which have no SIM card to properly receive calls, but do receive the anomalous calls. We simply do not know, at this time, exactly how these events occur or are possible.

In paranormal research, it is the reporting of these cases that is important. These and similar phenomena are reported by individuals who have never met or known each other, and live thousands of miles apart, and often hundreds of years. Yet the reports remain consistent. Case studies, in volume and over time, allow for hypotheses and theories. It is in this simple interests of reporting that this section is included.

The Ovilus is a device that intercepts EMF signals, and converts them to audio, from an internal dictionary of over 2,000 words. It is theorized that discarnate entities may be able to INFLUENCE, under some circumstances, this word selection process. It is not thought, in the majority, that these entities may exert 100% CONTROL over the word selection, and simple research and listening to the output of the device verifies this, to the normal and reasonable individual. It is also noted that coincidence may play a part in the process, with the probability of about 1 in 2,047, in getting a correct response to a direct question. It is only in the long term studies, with consistent reporting, that more exacting theories regarding coincidence versus influence may be formulated. Probability, from a math standpoint, rises sharply as valid answers are observed in larger quantity, over a brief period of time and small number of total responses. For example, the probability of getting two correct responses in a row is 1 in 4,190,209. (1/2047 x 1/2047) This assumes there is only one correct response per each individual question.

The manufacturer of the Ovilus device indicates at the present time, there is insufficient data, science, and case study to indicate the Ovilus data should be evidential. This author agrees. This case study is not presented as hard evidence. It is presented so that others may have and consider its merits, or lack thereof. If no reporting is made, no theories may be formulated, or comparisons made with other reports to study correlations, if any. Each person who reads Part Three must consider this data in light of his own beliefs, or knowledge of events that are known to have occurred to them personally. Beauty here is truly in the eye of the beholder, or its lack thereof.

SUMMARY OF INTRODUCTION - PART THREE - The data presented here on Part Three IS NOT CONSIDERED EVIDENTIAL by the manufacturer of the Ovilus device or the La. Spirits North Team. It is simply included in the interests of completeness of events, and for study/research purposes only.

PART FOUR

THE MODEL P-SB7 SPIRIT BOX

This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.

DATA RECORDED FROM THE P-SB7, BY BESS MAXWELL

CLIP ONE, SWIMMING POOL AREA

MALE VOICE: “WHAT IS IT?”

CLIP TWO, SWIMMING POOL AREA

MALE VOICE: “YOU'RE WELCOME.”

CLIPS THREE THROUGH EIGHT FROM THIRD FLOOR HALLWAY.

CLIP THREE,

MALE VOICE: “KIRK.” KIRK IS ONE OF OUR INVESTIGATORS.

CLIP FOUR,

BESS MAXWELL: “YES, KIRK'S HERE. IS THERE SOMETHING YOU NEED TO TELL HIM?”

MALE VOICE: “WHAT'D YOU SAY?”

CLIP FIVE, RECEIVED AS A COMMENT,

MALE VOICE: “ED.”

CLIP SIX,

CONNIE WILLIAMSON: “ARE YOU MAD THAT CHERYL IS NOT HERE?”

MALE VOICE: “SOMEWHAT.”

CLIP SEVEN,

BESS MAXWELL: “WHAT DO PEOPLE DO IN HERE?”

MALE VOICE: “SWIM.”

CLIP EIGHT, RECEIVED AS A COMMENT.

MALE VOICE: “HARRY.”

CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from appliances and electrical devices. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Eight EVP voices made of words formed by the P-SB7 were noted, and no clips by standard digital recording were noted. The REM-Pod fired numerous times in the living/dining area for a period of about one hour, no natural explanations noted. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. The consciousness testing was strong, and consistent in many areas. The Ovilus data was limited in quantity, though we are not sufficiently familiar with the residence and family dynamics to draw any conclusions from this data. We feel that these experiences, and the positive tests received are probably indicative of an anomalous presence or presences, and that these do not seem malicious or harmful in any way. The consciousness testing seemed to show a presence or presences with a high degree of probability.

We would like to thank the clients for inviting us into their location, and for the opportunity to study the phenomena there. We would also like to thank them for their most gracious hospitality, and hope that me may be able to return there again soon.
