HISTORY

The clients have lived in this mobile home for several years, with anomalous events beginning about 18 months ago. The exact age and prior history are unknown.

EXPERENCES

The clients have felt being touched, as if by unseen hands. The lights flicker on and off, with no known electrical issues. Other electronic devices have been turned on and off with no one near these devices. Battery drains, very sudden, have been noted in electrical items. The figure of a woman has been seen by family members. Strange smells have been noted, such as cigar smoke, with no known natural source. The smell of strange cologne has been noted.

INVESTIGATION

DATE OF INVESTIGATION: May 14, 2016

PARTICIPANTS: BESS MAXWELL, CONNIE WILLIAMSON, KIRK CORNIER, and SUSAN COLEMAN

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, Various EMF meters including Tri-Fields, Rempods, and Motion detectors including geophone and laser grid systems. Ovilus interactive voice communications devices were present.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video, or digital photography. No unusual shadow events were noted during use of the laser grid system. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. No EVP voices or anomalous sounds were recorded. No anomalous data was recorded from the Ovilus device. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. No inordinate positive ion counts were noted.

PERSONAL EXPERIENCES

TEAM MEMBERS - During the investigation, the Rempod unit fired several times in rapid sequence, while in one of the bedrooms. No electrical devices were noted near to cause a false positive, though a false positive could not be ruled out.

CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. No recordings were noted of words formed by using the P-SB7. No EVP recordings of voices or anomalous sounds were noted. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. One anomalous signal was noted in one bedroom from the Rempod.

The only data noted was from the Rempod unit. This alone is not sufficient to indicate an anomalous presence. We cannot say, therefore, that there is, or is not, an anomalous presence in this home. We can only state that we could not document an anomalous presence at the times of testing, in the places tested, and by the testing methods utilized.

We would like to thank the clients for inviting us to research the reported phenomena there. We hope that we may be able to return there again soon for additional study and research.
