# CONCLUSION

At the time and places tested, no anomalous photos were taken. One was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. One EVP voices was recorded. Six recordings were made of words formed by the P-SB7. We feel that the personal experiences, and the audio tests received are probably indicative of an anomalous presence or presences, though without harmful intent.
